PROFIL

Software Developer with a degree in Information Technology and a focus on C#/.NET development. Through academic and personal projects, I have gained practical experience with ASP.NET Core Web API, databases, REST APIs, and mobile application development using .NET MAUI. I am seeking a Software Developer / .NET Developer position where I can apply my existing knowledge and continue developing my technical skills.

TEHNICAL SKILLS

Programming: C#, PHP, JavaScript, C

.NET: ASP.NET Core, Web API, Entity Framework Core, .NET MAUI, XAML

Web: Laravel, HTML, CSS, Bootstrap, jQuery

Databases: SQL Server, MySQL, SQLite

Concepts & Architecture: REST API, Clean Architecture, CQRS, MVVM, Dependency Injection, JWT

Tools: Git, GitHub, Visual Studio, VS Code, XAMPP

PROJECTS

VroomVista | C#, ASP.NET Core Web API, Entity Framework Core, SQL Server

- Developed a car rental system following Clean Architecture principles.
- JWT authentication, refresh tokens, and role-based authorization.
- Vehicle search and filtering by category, brand, and location.
- Reservation system with additional options and payment processing.
- Driver's license verification and email notifications.
- CQRS, Dependency Injection, and relational database concepts.
- Audit logging and centralized exception handling.

GitHub: github.com/vukasinantic04/VroomVista

TechStore | PHP, Laravel, MySQL

- Development of an e-commerce web application using the Laravel framework.
- Implemented user registration and authentication.
- Product search, filtering, and display.
- Admin panel for managing products, categories, brands, users, and orders.
- MySQL database management using migrations and seed data.
- Email service integration via SMTP.

GitHub: github.com/vukasinantic04/TechStore

Cinema | C#, .NET MAUI, SQLite, TMDB API

- Development of a cross-platform application for browsing and searching movies with TMDB API integration.
- User registration and login with SecureStorage for session management.
- Watchlist, Favorites, and search history with local data storage using SQLite.
- MVVM, Dependency Injection, and device feature integration: camera/gallery access, Share, Connectivity, and Accelerometer.

GitHub: github.com/vukasinantic04/Cinema

GameHaven | HTML, CSS, JavaScript, Bootstrap, jQuery

- Development of a responsive multi-page website for browsing and purchasing video games.
- Dynamic generation of content, game cards, and modal windows using JavaScript.
- Game filtering and interactive slider/carousel components.
